

NVS' New Construction Solution

*Having problems finding qualified appraisers to complete
New Construction or Renovation assignments?*

Seeing delays in the assignment process with an AMC or panel?

*Are appraisals getting hung up in Quality Control for days
at a time, going back and forth?*

Is the work actually getting completed accurately and on time?

For years NVS has been monitoring the landscape and listening to clients regarding New Construction and Renovation work. NVS appraisers are vetted, tested, reviewed and monitored in over 10 different areas of expertise. NVS then leverages technology to provide unique and custom solution workflows for new construction appraisals.

Today NVS has a national panel of over 1,100 appraisers who have been certified to complete New Construction and Renovation assignments.

NVS can immediately align sub panels with clients to ensure an appraiser in the local market, with a history and relationship with the builder and sales office, is quickly assigned to the appraisal order.

NVS utilizes multi-faceted metrics that leverage technology and valuation expertise to deliver clients quality appraisal reports. The NVS quality assurance process starts when an appraiser is hired with a custom product specific letter of engagement. It incorporates 4 proprietary quality control stages to ensure a credible and compliant report every time.

For lenders experiencing any of these pain points or to hear more about NVS solutions contact NVS today at NVSsales@nationsvs.com or (866)967-1544
